SOURCE

1. A large airfield was under construction northwest of "ARSAN", west of the improvised RR central station, from the summer of 1947 to the summer of 1948. According to Polish workers, it was to be the largest military airfield of Poland. The field was estimated at two and one half miles square. Three runways, each 5,000 feet long and 330 feet wide, were scheduled to be laid. The construction work was to be completed within five years. High ranking Soviet officers were occasionally observed at the field. German PWs unloaded gravel and cement and did grading work. Polish labor details arrived at the field in the summer of 1948.
